# BlackBerry Access for Android version 2.12.0.1439

This release of BlackBerry Access for Android features the following enhancements:

- Files can now be uploaded from the downloads folder in BlackBerry Access or from other BlackBerry Dynamics apps. Administrators can control this behavior using the **Allow file uploads from Dynamics Containers** app configuration setting. Other enhancements to the upload files feature include more allowable extensions and automatic upload resume after interruption.
- BlackBerry Dynamics Connectivity profile change: The Route All option has been replaced with a Default Route option in the BlackBerry Dynamics Connectivity profile allowing for more detailed control over how BlackBerry Dynamics apps built using the latest BlackBerry Dynamics SDK can connect to app servers. This allows you to configure rules to avoid double tunneling the UEM App Store and UEM hosted application push.
- Short names are now resolved to FQDN for Kerberos authentication going over proxy.
- A new "Prompt individually for each domain before passing the link to be opened in Native/External browser" app configuration setting has been added. When this policy is enabled, when the user selects "Always open links from "<domain>" in External Browser" the user will not be prompted again for any other hosts the user accesses within the same domain. By default, this policy is disabled and users are always prompted to open the URL in External Browser.
- 64-bit architecture is supported.
- You can now create URLs or QR codes that direct users to a new or updated app in the BlackBerry UEM App Catalog.

## BlackBerry Dynamics SDK, BlackBerry Dynamics Launcher, and BlackBerry Analytics versions

- BlackBerry Dynamics SDK 6.0.0.104
- BlackBerry Dynamics Launcher 2.10.0.115
- BlackBerry Analytics 2.1.0.28

## OS compatibility

- For device OS compatibility, [see the Mobile/Desktop OS and Enterprise Applications Compatibility Matrix](#).

## Supported upgrades

- BlackBerry Access for Android 2.10.2.1389 > BlackBerry Access for Android 2.11.0.1403 > BlackBerry Access for Android 2.11.1.1419 > BlackBerry Access for Android 2.12.0.1439
- BlackBerry Access for Android 2.11.0.1403 > BlackBerry Access for Android 2.11.1.1419 > BlackBerry Access for Android 2.12.0.1439
- BlackBerry Access for Android 2.11.1.1419 > BlackBerry Access for Android 2.12.0.1439

## Fixed issues

There are no fixed issues in this release.

## Known issues

An IP of an internal site is being blocked if its route type is BlackBerry Proxy and default route is set to Deny.

**Workaround:** When configuring a Connectivity profile, when the Default Route is set to Deny and only an IP range is allowed for accessing a website, you must add the host names explicitly to the Allowed Domains list select either the BlackBerry Proxy or Direct option (GMAGDAND-8978).

When navigating to a deep link that has an invalid app ID, users must press the back key twice to exit the Appstore.(GMAGDAND-8886)

## Known limitations

Appstore deep links are entitled only after a user presses the BlackBerry Dynamics Launcher icon at least once after a device restart. (GMAGDAND-8901)
