What's new in BlackBerry Edit

In this release of BlackBerry Edit, the BlackBerry Docs To Go app for iOS and Android devices will be upgraded to BlackBerry Edit, which provides improved functionality for secure document viewing and editing within BlackBerry Dynamics.

With this upgrade, users will continue to have access to all the features that were available in BlackBerry Docs To Go and additional features such as:

- Expanded formatting with support for images, shapes, graphs, and charts
- Tracked changes
- Support for wireless printing.

Note: The “Allow Printing” option in the App configuration for BlackBerry Edit controls this feature. By default, this setting is set to off.

- Conversion of Microsoft Office files to PDF

With this release, BlackBerry Docs To Go will change its appearance, icon, and name to BlackBerry Edit in the Apple App Store for iOS, Google Play for Android, and the BlackBerry UEM enterprise app store:

- No action is required from users if the Automatic Update feature is enabled on their iOS and Android devices.
- All files that the user stored in BlackBerry Docs To Go before the upgrade are available to the user after the upgrade to BlackBerry Edit.
- Users that have the Automatic Update feature disabled on their iOS and Android devices must initiate the update from the appropriate app store.
- No action is required from administrators on the server side. BlackBerry Enterprise Mobility Suite - Collaboration Edition, BlackBerry Enterprise Mobility Suite - Application Edition, and BlackBerry Enterprise Mobility Suite - Content Edition, which include entitlement for BlackBerry Edit, are not affected.

Ensure that you:

- Notify users in your organization about the upgrade, which includes a change of icon, name, and look of BlackBerry Docs To Go.
- Distribute the User Guide for the BlackBerry Edit app to help users learn how to use BlackBerry Edit.

iOS

You could not open a document in BlackBerry Edit if the document originated from a non-BlackBerry Dynamics app such as Google Drive. (JI 2651670)

Workaround: In the BlackBerry UEM console, disable the "Allow Printing" policy in the App configuration for BlackBerry Edit.
